

## Obtaining GoDaddy Domain

- Create a GoDaddy account

- Buy the desired domain (for mcsc, the current owner of mcscomp.org will simply sell the domain to the next owner of the competition)

- Setup the domain (very basic/verbatim so will not elaborate)

## Configuring Domain DNS

- Enter the Domain Manager port for the site

- Scroll to the bottom and click on the Manage DNS link

- Change the A record with name @: turn the value into [Static-IP]

- Create an A record with the name www.[domain]: turn the value into [Static-IP] as well
